

Hugo BRAJDIC

Software Engineering Intern (Summer 2026)

Contact me on hugobrajdic.fr

PRESENTATION

As a software engineering student at IMT Atlantique, I am required to complete an international internship as part of my degree. I am currently working as a software engineering apprentice at Covéa, a major insurance group in France.

Available between mid-May and September 2026, I am looking for an internship in an English-speaking environment where I can put my technical skills into practice in an innovative setting, collaborate with experienced professionals, and broaden my horizons by working in an international context.

EDUCATION

IMT Atlantique

Nantes, France - Sept. 2024 – Today

Software Engineering (FIL)

Apprenticeship Program

1st year GPA: 3.66/4

IUT of Laval

Laval, France - Sept. 2022 – Sept. 2024

BSc in Computer Science

Application development course

Top of the class

SKILLS

PROGRAMMING

Java EE • JavaScript • Angular • React •
MySQL • HTML/CSS • Elasticsearch •
Mongo • NodeJS • AnodisJS • Git

LANGUAGES

French: *Native speaker*

English: *Proficient (ECRL C1)*

EXPERIENCE

COVÉA – Software Engineer Apprentice

Le Mans, France — Sept. 2024 – Today

- * Joined a **cross-functional Squad** contributing to Covéa's strategic transformation initiative within the DSIN, aiming to **modernize** and **standardize internal development practices**.
- * Built **automated migration** using **OpenRewrite** to **update hundreds of internal projects** to the company's latest technical standards.
- * Delivered significant efficiency gains by automating migration processes — **saving an estimated 80% of the manual effort** previously required from development teams.

COVÉA – Java/JavaScript Developer Apprentice

Le Mans, France — Sept. 2022 – Sept. 2024

- * Designed and delivered a **full-stack web application** to centralize the management of **KPI datasets** for **15 direct users**, supporting IT KPIs generated and used in **dozens of projects**.
- * Implemented **RESTful backend services** in **Java EE**, a **reactive Angular frontend**, and **Elasticsearch** for **real-time data ingestion**, improving **data consistency** and **reducing KPI update latency** through centralized reference management.
- * Contributed to **Covéa's IT transformation** toward an **internal cloud service provider model** by **evaluating Backstage** as a replacement for an existing developer platform for **all development teams within the DSIN**.
- * Developed a **custom React plugin** for **live application log visualization** and filtering, **enhancing developer experience** and **application observability**.

PROJECTS

Inventory Management Application

React, Tailwind, AnodisJS, Docker & PostgreSQL

- In a team of 4 people, contributed to the development of a **full-stack** web application for managing classroom inventory using barcode scanning of rooms and equipment.
- Integrated **RESTful API** to fetch and update inventory data in real time, enabling **dynamic** and **responsive user interfaces**.
- Improved inventory accuracy and **reduced manual effort** by automating data collection.

Nasa Flight Information App

Flutter (Dart) & Android Studio

- Created a **mobile application** displaying **real-time data** about SpaceX launches and missions. Incorporated the public **Nasa API** to retrieve and **visualize flight information** such as launch dates, rocket details, and mission outcomes.
- **Enhanced skills in API integration**, asynchronous data handling, and **mobile UI design**.
